

# Concurrent Degrees

## Master of Community and Regional Planning

Our students may pursue another advanced degree at the same time as their MCRP. Some students begin their studies as concurrent students while others decide to earn a second degree after they have already begun a course of study. Students must apply and be accepted to both programs in order to earn a dual degree. Generally, both degrees can be earned in one less year than it would take to earn both degrees separately.

Academic plans for concurrent degrees are approved on a case-by-case basis, but typically follow the schedules below. Review the MCRP [two-year program sample schedule](#) for a detailed example of what courses are required in the first year of the MCRP program.

The examples included here are the most common degrees MCRP students pursue concurrently, but this is not a complete list. Contact our department if you have questions about a dual degree with a program you do not see listed.

### Conflict Resolution

<http://conflict.uoregon.edu/>

	Year 1	Year 2	Year 3
Option 1 CRES First	<b>Summer - Spring</b> -CRES Core and Electives	<b>Summer - Spring</b> -CRES Summer Internship -MCRP Core -Community Planning Workshop -CRES Capstone	<b>Fall - Winter</b> -MCRP Core -MCRP Final Project -CRES Capstone
