

## UNDERGRADUATE MINOR IN PLANNING, PUBLIC POLICY AND MANAGEMENT

---

The PPPM minor provides a professional and applied context for a student's major discipline, allowing students in other majors to supplement learning in their major field with an overview of public sector issues, and the development of public sector professional skills. Through the PPPM minor, students can enhance their undergraduate education to include preparation for a variety of professional occupations and areas of graduate study. Students in the minor are introduced to a broad overview of issues in urban and regional planning, public policy, and nonprofit management. Through the selection of elective courses, students can choose to focus on a field of interest area ranging from social and health policy to land use planning to public management.
